ABOUT IMIB

Istanbul Mineral Exporters' Association (IMIB) is a professional non-profit association which deals with all export activities in minerals sector. Istanbul Mineral Exporters' Association was founded in 1976 and has almost 6.000 members as of 2024. Among the principle areas of business of IMIB are natural stones, borates and concentrates, chromium ore, copper ore, magnesite, ferrochromium, zinc ore and feldspar products.

6.000

imib ISTANBUL
MINERAL EXPORTERS'
ASSOCIATION

VISION:

Making the best effort in all aspects of the business realm in order to improve sustainable export in minerals sector including natural stones.

MISSION:

- Increase the competitiveness of Turkish minerals exporters' in global market
- Provide export advice and assistance to our members to penetrate all markets worldwide
- Promote minerals sector through trade exhibitions, buying and trade missions, projects and publications
- Provide export related information by our studies and researches
- Find solutions to export related problems
- Establish and develop relations with international organizations to keep warm the interests of our members

ABOUT TURKISH STONES

The homeland of natural stone, Türkiye has been a source of inspiration in architecture in stone for more than 12.000 years. Situated in the middle of the Alpine - Himalayan geological belt stretching from Europe to Asia, Türkiye's unique geography and history have placed it in the center of human civilization and architecture since prehistoric times. Since 2.000 BC Türkiye contains many antique quarries with high quality stones that are used by many different civilizations over the centuries and are still being active even today. Today Türkiye is home to the world's largest natural stone reserves with a wide variety of Turkish Stones offered in more than 150 stone types and more than 650 colors and patterns. Türkiye offers this abundance of natural stone to designers, architects and buyers with patterns and colors of high quality marbles such as Anadolu Beige, Anadolu White, Anadolu Black and Anadolu Travertines, alongside its unique

and signature marbles like Elazığ Cherry, Milas Lilac & Marmara Marble. As the leading global source for natural stone, Türkiye exports a host of Turkish Stones to global architecture projects. In addition to marble and travertine, Türkiye exports basalt, dolomite, limestone and granite either as blocks or as processed stone products such as tiles and mosaics. As being the number one marble and travertine exporter with 2 billion dollars exportation, Türkiye exports various stone types either as blocks or as processed stone. Turkish Stones exporters are known for their high level of service and know-how. Applying technology, Turkish Stone producers can create natural stones, in any shape and forms that can be imagined and designed. Turkish natural stones can be transformed from monolith organic forms to the thinnest sheet to decorate interiors from home to automobile. Excellent craftsmanship and high-end technology result in inventive tailor

made forms with the possibilities of Turkish Stone and the advanced service and fulfillment capabilities of Türkiye's stone industry. Striking Turkish Stones of exceptional quality and durability are the perfect choice for architects, interior designers and individuals looking to create original designs.

As the homeland of natural stone, architects and designers look to Turkish Stones and the natural stone industry in Türkiye to take advantage of thousands years of knowledge on stone in architecture and the extensive collection of natural stone and innovative products with technological enhancements that makes luxury of natural stone accessible.

Turkish Stones is being promoted by the Istanbul Mineral Exporters' Association (İMİB), a professional non-profit association that has overseen all export activities in Türkiye's minerals sector since 1976.

LEONARDO MARBLE

ABOUT

Leonardo Marble: Pioneering Global Trends in Natural Stone for Over Three Decades

With an impressive lineage spanning 32 years, Leonardo Marble stands tall as a paramount trader and manufacturer of Turkish natural stone. Our journey began in 1992, marking our foray into the granite trading business, importing blocks from nations such as Ukraine, Russia, and Kazakhstan to diverse markets including Türkiye, Italy, and the Far East. Responding to a surging demand, our pursuits expanded, exporting the splendors of Turkish marble, travertine, and limestone.

Our deep-rooted experience and insightful feedback propelled our focus towards Italy, an undeniable maven in stone-related architectural trends. This realization culminated in the birth of our first Italian partnered venture, A&G 23 S.R.L. in the historic city of Carrara in 2008. Since then, we have been at the epicenter of evolving global stone trends, offering the richness of both Turkish and Italian blocks and slabs to countries spanning the continents.

In addition to our trading endeavors, we pride ourselves on our direct involvement in the very essence of stone extraction. In 2012, we initiated quarry operations with the Moca Quarry, nestled in the Elazığ Province of Türkiye.

Here, we extract limestone in two mesmerizing shades: the world-renowned Gold Moca and Silver Moca.

Whether it's a trading partnership or a quest for the finest stone, Leonardo Marble promises excellence, heritage, and an undying commitment to the world of natural stones.

TOPAZ – PLACCO TERRAZZO

ABOUT

TOPAZ, established in 1998, aimed to manufacture high-class tiling materials, as well as precast covering members that were impractical to produce on building sites, achieving top-quality results in the most economical manner. TOPAZ has solidified its position in the industry by chasing sector's requirements and delivering its products to numerous regions across the globe. Always innovative, it takes its products to the next level with its in-house R&D engineers. In parallel, PLACCO, born from the demand for natural and vivid terrazzo, leveraged 25 years of expertise from Topaz Prekast to specialize in cement-based terrazzo slabs. Notably, PLACCO's terrazzo, with dimensions of 60x60 cm, can achieve a remarkable thickness of 1.2 cm, providing an elegant and environmentally friendly solution that perfectly complements TOPAZ's commitment to innovation and quality in the construction industry.

PRODUCTS

Terrazzo Paver, Tile, L Shaped Stair, U Shaped Coping, L Shaped/Bullnose Pool Coping, Slab, Table Top
